SECTION 01

Foundation.

Who we are, what we sound like, and the numbers that define us. Everything downstream builds on this page.

BRAND PERSONALITY

Who Easy Pay Direct is.

We get it done when others can't. Easy Pay Direct is a payment processing platform for real businesses. The brand system is built to communicate trust, stability, confidence, and reliability, balanced with the energy, clarity, and forward motion of a modern fintech.

Serious fintech console, not a playful startup. Technical, but human. Every visual and verbal decision reinforces that we take payments as seriously as our merchants do.

TRUSTED 13+ years, billions processed	**TECHNICAL** Infrastructure-focused, system-driven	**HUMAN** Real support, real people, real approval
MODERN Dark-mode-first, monospace accents	**SCALABLE** 500+ integrations, 100k merchants helped	**APPROACHABLE** Sentence case, direct language

How we show up

Our brand reflects who we are and how we want merchants to feel when they see Easy Pay Direct. The unique combination of our culture and values drives our promise to make things easier.

- We are friendly, enjoyable, and helpful in all moments.
- We are experts in our field.
- We always go the extra mile.
- We are true to our word.
- We are professionally relaxed.
- We embody the phrase, “We’re here to make things easier.”
- We strive to be the positive experience.

Locked brand stats

Use these numbers verbatim across all marketing. Never invent new figures. Volume is always “Billions processed,” never a specific dollar figure.

100k	13+	500+	Billions	6.45/7
MERCHANTS HELPED	YEARS	INTEGRATIONS	PROCESSED	CSAT / 873 REVIEWS

CORE VALUES

What we stand for.

Five values that guide every decision, every merchant interaction, and every line of copy. They've been part of Easy Pay Direct since day one and they're not changing.

VALUE 01

Make things easier

- Simplify the work for others
- Be thorough with our work
- Work together through teamwork
- Efficiency

VALUE 02

Open, effective communication

- Being honest
- Having patience
- Active listening

VALUE 03

Do the right thing

- Look out for our partners, merchants, company, and teammates' best interests

VALUE 04

Persistence

- Getting it done
- Digging in to find solutions
- Going the extra mile

VALUE 05

Growth

- Evaluate progress
- Be better than the day before

BRAND ARCHITECTURE

Easy Pay Direct and EPD Commerce.

Two separate brands run by the same team. Easy Pay Direct is the payment processor. EPD Commerce is the commerce platform built on Easy Pay Direct processing. Each has its own logo, colors, voice, and brand repository. Keep them distinct.

	EASY PAY DIRECT / EPD COMMERCE
What it is	**Easy Pay Direct:** payment processor and parent company. Merchant accounts, underwriting, gateway, and a dedicated point of contact. **EPD Commerce:** products, checkout, subscriptions, revenue recovery, and agentic commerce. A DBA of Easy Pay Direct LLC.
Brand assets	**Easy Pay Direct:** brand.easypaydirect.com (this guide, logos, motif, approved graphics). **EPD Commerce:** github.com/EasyPayDirect/epd-commerce-brand (its own guidelines, names, and claims).
Look	**Easy Pay Direct:** brand blue and deep navy, green CTA buttons, the diamond motif. **EPD Commerce:** navy gradient panels, blue and white buttons, no green CTAs.

Rules

- Write **Easy Pay Direct** in full. Never shorten it to EPD. “EPD” on its own is the umbrella for the team and ecosystem behind both brands, for example “the EPD ecosystem.”
- Use the Easy Pay Direct logo on Easy Pay Direct materials and the EPD Commerce logo on EPD Commerce materials. Never merge the two logos into one lockup.
- Easy Pay Direct track record (13+ years, billions processed, 100k merchants helped) is Easy Pay Direct's. EPD Commerce materials may cite it only when they credit Easy Pay Direct.
- When easypaydirect.com covers an EPD Commerce feature, use the feature's real screenshots from the brand repository and its exact feature name, for example The Professor.

SECTION 02

Logo system.

The mark, the wordmark, and how to use them. Diamond and arrow. The two shapes that carry the brand.

LOGO SYSTEM

The primary lockup.

The most recognizable expression of Easy Pay Direct. A diamond-shaped badge containing bold condensed **EPD** letters, paired horizontally with the **EasyPayDirect** wordmark. The capital **T** in Direct is styled as a rightward-pointing arrow, a moving money forward motif.

Primary lockup, white on dark navy #000914.

LOGO SYSTEM

The stacked lockup.

An alternate form of the primary lockup for narrow or tall spaces: the diamond mark stacked directly on top of the **EasyPayDirect** wordmark. Use it in social avatars, event backdrops, product badges, and anywhere the horizontal lockup would be cropped or shrunk to illegibility. Both elements stay perfectly centered on the same vertical axis.

Stacked lockup, white on dark navy #000914. Use when vertical space is the constraint, such as square social avatars, event backdrops, and product badges.

LOGO MARK

The standalone mark.

The diamond-only version of the mark, for compact applications where the full wordmark won't fit: favicons, avatar images, app icons, or watermarks. Three treatments cover most contexts.

Tone-on-tone white
For layered/watermark use over brand-blue backgrounds.

Black outline
For light backgrounds and print applications.

Square on white
Profile pictures, app icons, and any square avatar slot. Solid white, not transparent.

Usage rules

Do	Don't
Use the white or reversed lockup on brand blue and dark navy backgrounds.	Recolor the mark outside the sanctioned palette.
Keep clear space equal to the height of the logo mark on all sides.	Rotate, stretch, or distort the mark or wordmark.
Use the standalone diamond mark for favicons, app icons, and avatars.	Add drop shadows, glows, or gradients to the logo.
Prefer the SVG or high-res PNG files for all digital use.	Place the logo on busy backgrounds without a solid backdrop.

LOGO SYSTEM

Clearspace and alignment.

Give the logo room to breathe. The minimum clear space on every side of the primary lockup is **X**, defined as the height of the **E** in the logo mark. That unit scales with the logo, so the rule holds whether the lockup is on a business card or a conference backdrop. Never place other elements, text, or graphics inside the safe zone.

Equal padding on all four sides. If you cannot keep X clearspace on any side, use a smaller logo or a different lockup.

Writing the name.

- Always write **Easy Pay Direct** as three words on one line. Never break the name across two lines. If it would wrap in a layout, shrink the container or reduce the type size.
- Never abbreviate to **EPD**, in body copy, headlines, captions, or file names people will see. “EPD” on its own means the umbrella ecosystem behind Easy Pay Direct and **EPD Commerce**, never Easy Pay Direct specifically.
- Use sentence case in headlines (“Who Easy Pay Direct is”) not Title Case. UPPERCASE is reserved for DM Mono eyebrows, labels, and button text.
- Do not stylize the name with an ampersand, punctuation, or spacing variants. It is always **Easy Pay Direct**, three words, three capitals, one line.

SECTION 03

Color.

Brand blue for dark sections, deep navy underneath, green for action. Everything else supports.

COLOR SYSTEM

Flagship colors.

The Easy Pay Direct brand is dark-mode-first. Brand blue carries hero and dark sections, deep navy sits underneath as the deepest surface, vibrant green marks every call to action, and cool blue-grey neutrals hold everything together. Light sections use Neutral 50 and Neutral 100.

PRIMARY

Brand Blue
#003C7E

Hero and dark section backgrounds, identity moments

ACCENT

CTA Green
#3DDC73

Primary buttons only, black text on green

SURFACE

Deep Navy
#000914

Deepest surface: footers, gradient stops, deepest panels

SURFACE

Card Navy
#1C2434

Elevated cards and containers

Supporting colors

Interactive Blue	#006EE8	Links, hover states, blue accents
Blue Hover	#0056BB	Hover state for interactive blue
Light Blue	#48C6FF	Highlights on dark navy
CTA Hover	#21B654	Hover state for CTA green
Gold	#FFC046	Star ratings only, never a general accent

COLOR PALETTE

Colors by job.

Grouped by what they do, not what they look like. Pick the row that matches your job, pull the swatch, move on.

Text on light Headlines & body	BLUE 950 #000914	NEUTRAL 900 #2A374F	NEUTRAL 500 #5273A4		Blue 950 for headlines. Neutral 900 for body. Neutral 500 for muted.
Text on dark On navy sections	NEUTRAL 100 #EBEDF6	NEUTRAL 200 #D1D8E7			Neutral 100 for primary text. Neutral 200 for muted. Never a blue on blue background.
Backgrounds, light Section surfaces	NEUTRAL 50 #F5F6FA	NEUTRAL 100 #EBEDF6	BLUE 50 #EDF6FF		Neutral 50 is the primary. Neutral 100 alternates. Blue 50 for tinted cards.
Backgrounds, dark Hero & deep surfaces	BLUE 900 #003C7E	BLUE 800 #00499A	BLUE 950 #000914		Blue 900 is the hero background. Blue 800 alternates. Blue 950 is the deepest surface and gradient stop.
Links & interaction Rest & hover	BLUE 600 #006EE8	BLUE 700 #0056BB			Blue 600 is the standard link color. Blue 700 is the hover state.
Primary CTA Buttons only	GREEN 200 #3DDC73	GREEN 300 #21B654			Green 200 fills primary buttons with Blue 950 text. Green 300 is the hover. Never used elsewhere.
Borders & dividers Card edges & rules	NEUTRAL 100 #EBEDF6	NEUTRAL 200 #D1D8E7	NEUTRAL 300 #A4B9D3		Hairline borders on cards, table rules, dividers. Neutral 200 is the default.
Success tints Semantic backgrounds	GREEN 25 #E9FBEF	GREEN 50 #B1F1C7	GREEN 400 #1C9C48		Green 25 tinted background, Green 400 icon or text on top. Success states only.
Error & warning Semantic backgrounds	RED 50 #FEF2F3	RED 500 #DC2030	AMBER 50 #FFF7E6	AMBER 500 #F59E0B	Red for destructive states and errors. Amber for warnings and cautions.
HANDLE WITH CARE **Bright blues** Gradient stops only	BLUE 300 #48C6FF	BLUE 400 #00A8FF	BLUE 500 #008CFF		Gradient stops and edge highlights only. Never flat fills, buttons, or backgrounds.

COLOR RAMPS

Semantic system palette

Feedback states for the product interface. Read across each row to see how one state (Success, Error, Warning) is expressed at four different intensities. Column headers tell you which color to pull for which job.

	Background Full-bleed panels, banner fills, callout blocks	Tinted bg Card fills, inline notice backgrounds	Icon / fill Icons, buttons, badges, status dots	Text / border Body text on light bg, or borders on tinted bg
Success Confirmations, receipts, positive states.	#E0FAEC	#C2F5DA	#06B558	#0B4627
Error Failed payments, validation errors, destructive actions.	#FFEBEC	#FFC0C5	#DC2030	#681219
Warning Retries, expiring cards, caution states.	#FFF3EB	#FFD9C0	#FA7319	#71330A

How to read this. Pick a row for the message (Success, Error, or Warning). Pick a column for the surface (a big banner, a card, an icon, or text). The cell tells you the exact swatch. Do not mix intensities within one component: a Success banner uses the Success Background color plus the Success Text color, not a Warning border.

SECTION 04

Typography.

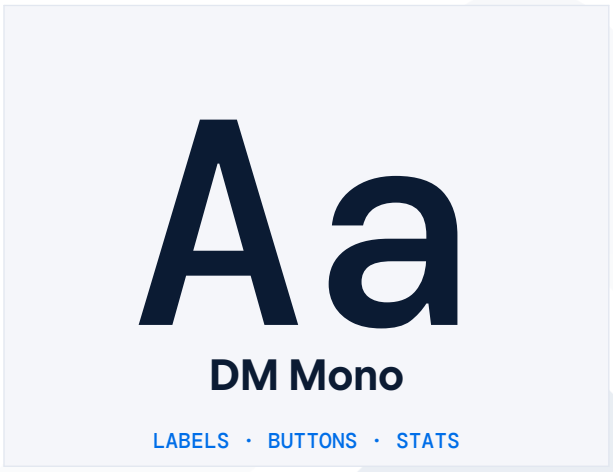

Two typefaces do all the work. General Sans for headings and body, DM Mono for the technical accents.

TYPOGRAPHY

Two typefaces. Nothing else.

General Sans handles every headline and every paragraph. DM Mono handles the technical layer: buttons, eyebrows, labels, stat counters, and any moment that should feel system-driven.

General Sans. Clean geometric structure, modern proportions. Available from Fontshare (free commercial). Headings use Medium (500) weight only. Body copy uses Regular (400).

DM Mono. Monospace construction reinforces the platform's infrastructure-focused identity. Available from Google Fonts. Always UPPERCASE with +0.03em to +0.06em letter-spacing.

Typography rules

- Headings are always Medium (500). Never Bold or Black.
- Body copy uses slightly tight tracking: -0.01em.
- Anything in DM Mono is UPPERCASE with +0.03em to +0.06em letter-spacing.
- Headlines use sentence case, not Title Case.
- Italic eyebrow line (BLUF) may appear above the H1 on hero sections.

TYPE SCALE

Sizes, weights, line heights.

The live scale used on easypaydirect.com. All headings render at Medium (500). Never Bold or Black.

STYLE	SIZE / LH	FONT	SPECIMEN
Display	56 / 62px	GS Medium	I am the one who knocks on the door. Chemistry is change.
H1	48 / 56px	GS Medium	You're a smart guy, Walter. But you're not that smart.
H2	40 / 44px	GS Medium	If you don't know who I am, tread lightly from here on out.
H3	32 / 35px	GS Medium	The chemistry must always be respected in the lab.
H4	28 / 31px	GS Medium	Yeah, science! Chemistry is the study of change.
H5	24 / 26px	GS Medium	You clearly don't know who you're dealing with.
H6	20 / 22px	GS Medium	Stay out of my territory. This is my product.
Body LG	18 / 25px	GS Regular	Better call Saul. Tread lightly, Walter White.
Body MD	16 / 24px	GS Regular	I am the danger. I am the one who knocks.
Body SM	14 / 20px	GS Regular	Say my name. Say it. You know who I am.
Label	14 / 20px	DM Mono Medium	HEISENBERG · TREAD LIGHTLY
Button	14 / 20px	DM Mono Medium	SAY MY NAME
Caption	13 / 18px	GS Regular	99.1% pure.

SECTION 05

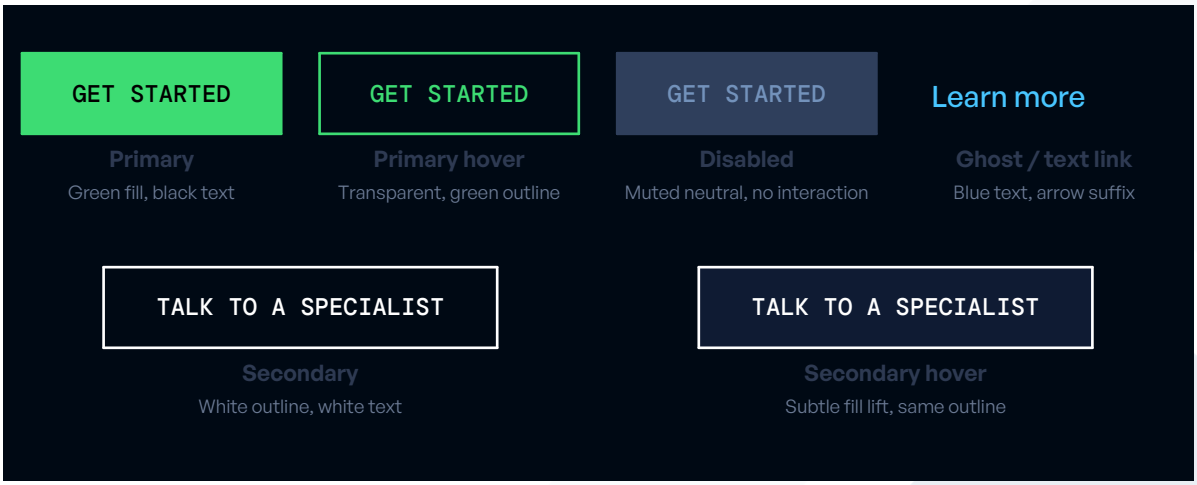

Buttons & surfaces.

The interactive layer of the brand. CTAs, cards, borders, gradients. What every merchant clicks.

BUTTONS

Calls to action.

On owned Easy Pay Direct surfaces, every page has two CTAs: **Get Started** (primary, green) and **Talk to a Specialist** (secondary, outlined). Buttons always use DM Mono Medium, UPPERCASE, 14px, +0.03em, 4px radius, roughly 16 by 10px padding.

CTA labels: owned versus co-branded.

The visual button treatment is constant everywhere Easy Pay Direct appears. The words inside the button depend on whose surface it lives on.

Owned Easy Pay Direct surfaces	Co-branded surfaces
easypaydirect.com, Easy Pay Direct emails, ads, event booths, and any Easy Pay Direct PDF or deck. Use the locked labels exactly: **Get Started** (primary), **Talk to a Specialist** (secondary). Do not paraphrase.	Partner integrations, guest webinars, third-party marketplace listings, syndicated content. Match the partner's convention and platform. The button style (green fill, DM Mono, uppercase, 4px radius) is the constant. Example: “Try Easy Pay Direct in Replit” or “Install the MCP server”.

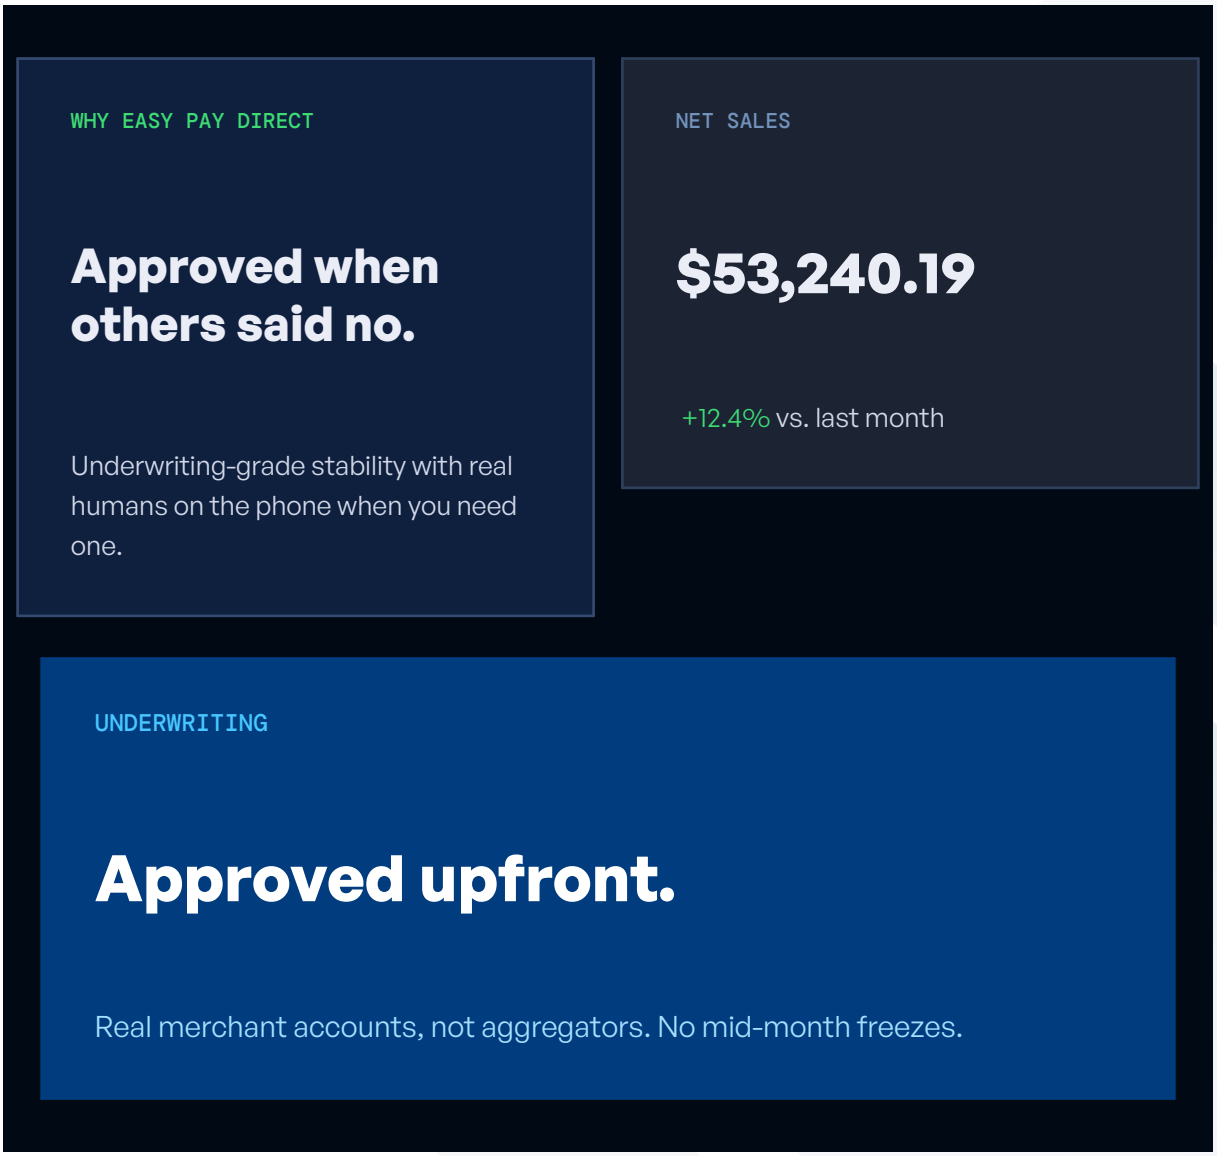

Always keep: the green fill, DM Mono uppercase, 4px radius. Never make it pill-shaped, gradient-filled, or oversized. Never use the primary green button for a destructive or warning action.

Radius scale: 4 (buttons) / 8 / 10 (cards) / 12 / 16 / 24 / 40 / 56px. **Border-glow:** a card at focus or hover gets a 1px border shift toward Blue 300 or Green 200. Never add a drop shadow.

CARDS & SURFACES

Card treatments.

Three card types cover every layout. Radius 10px, 1px border. Shadows are 1px border-glows, never drop shadows. Padding is 20px on all sides unless the card contains a single stat, in which case 24px is fine.

Glass
Hero and marketing surfaces. Blue-tinted fill, subtle border.

Elevated
Product and dashboards. Solid dark navy, subtle border.

Tone-on-tone
Statement blocks and feature callouts. Solid brand blue, no border.

SECTION 06

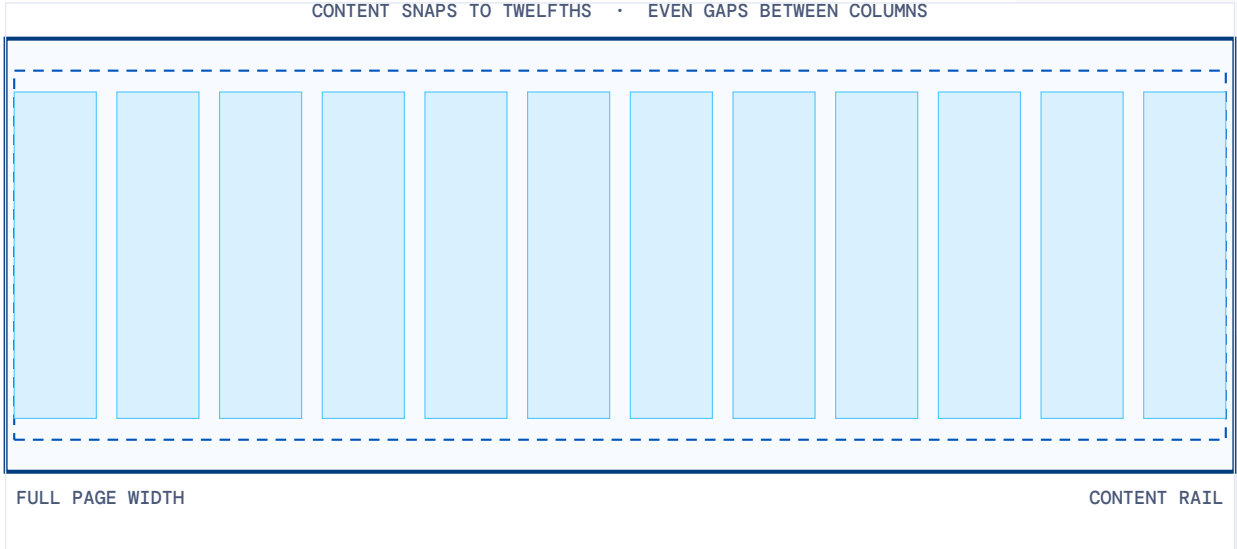

Layout & imagery.

How pages are built and what they show. Structure, spacing, and the photography rules.

LAYOUT SYSTEM

How pages are built.

Every page on easypaydirect.com is built on a shared rail. Content sits inside a centered strip. Backgrounds stretch full width, but headlines, paragraphs, and cards line up to the same invisible ruler so nothing drifts. Elements snap to that ruler in twelfths, which is what lets a hero span the whole page, a three-card row split cleanly, and a stat grid line up down the page.

Backgrounds fill the full page. Text and cards live inside the centered rail. Elements align to twelfths of the rail, with even gaps between columns, so a hero can span the whole strip and a three-card row can split cleanly without any manual math.

How the site is laid out

Backgrounds are full width

Text and cards sit inside a centered rail

Everything aligns to a shared vertical rhythm

Rows split evenly into halves, thirds, or quarters

Spacing feels consistent

Gaps between elements step up in a predictable scale

Never eyeball spacing. Pick a step and stick to it.

IMAGERY & MOTIFS

What we show.

Brand blue and deep navy scenes with soft blue glows. Product mockups inside device frames. Photography is candid and interview style. Real people, mid conversation.

Motif rules

Use

- The diamond motif, pasted from the five source files on the next page. Never redrawn or traced.
- Arrow motif (from the wordmark's T). Echo in cover slides, section transitions, background patterns.
- Soft blue radial/linear glows over dark navy for hero sections.
- Product screenshots inside device or browser frames on dark backgrounds.
- Logo clouds with partner logos rendered in white or light grey.

Avoid

- Inventing a new diamond shape, outlined or wireframe diamonds, or a single diamond as the subject.
- Heavy drop shadows. Use 1px border glows instead.
- Bold or Black headline weights (Medium only).
- Gradients outside the blue family.
- Gold #FFC046 for anything other than star ratings.

Gradient recipes

Hero glow

```
linear-gradient(180deg, rgba(1,62,122,0.5) 1.84%, rgba(1,62,122,0) 98.62%)
```

Diagonal glow

```
linear-gradient(225deg, rgba(1,62,122,0.5) 4.57%, rgba(1,62,122,0) 95.85%)
```

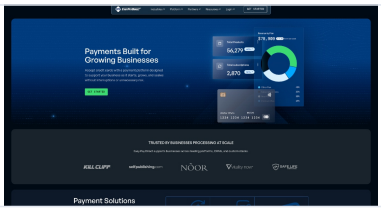

Glass card fill

```
linear-gradient(112.91deg, rgba(255,255,255,0.06) 3.51%, rgba(255,255,255,0) 111.71%)
```

IMAGERY & MOTIFS

Five motif variants.

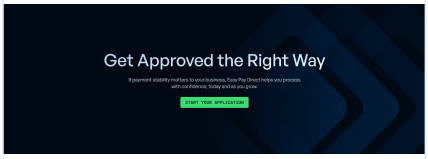

The motif is a nested rounded-diamond family. There are exactly five versions. Pick the one that matches the layout and paste it from the source file. Never invent your own.

HERO

Homepage hero, 9:16 vertical, emails with a central subject.

`assets/motif/motif-hero.svg / .png`

SIDE-RIGHT

Content on the left. Testimonial sections, wide 1.91:1 banners, blog headers.

`assets/motif/motif-side-right.svg / .png`

No live example yet

SIDE-LEFT

Content on the right. Mirror of side-right.

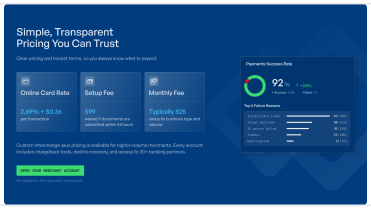

`assets/motif/motif-side-left.svg / .png`

SIDE-BOTH

Centered content, application forms, 1:1 and 4:5 social.

`assets/motif/motif-side-both.svg / .png`

SIDE-RIGHT-ON-BRAND-BLUE

Sections on brand blue #003C7E, such as pricing.

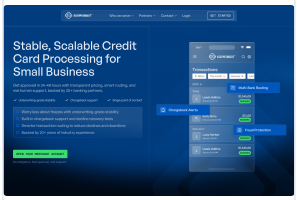

`assets/motif/motif-side-right-on-brand-blue.svg / .png`

The source PNGs are filled shapes at about 78% maximum opacity. Drop them in as they are: no strokes, no outlines, no thinning.

IMAGERY & MOTIFS

Motif placement, right and wrong.

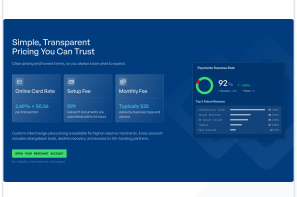

The top row is the live site. The bottom row is what image models produce when they ignore the source files. When in doubt, match the top row.

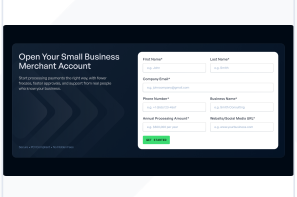

DO side-both framing content.

DO side-right with content on the left.

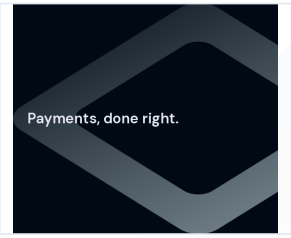

DO Tuned variant on brand blue.

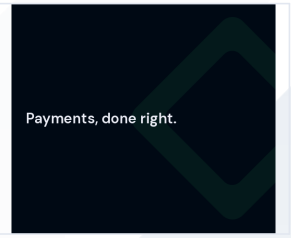

DO side-both framing a form.

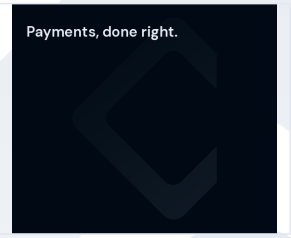

DON'T Invent a new diamond shape.

DON'T Use high opacity that hides copy.

DON'T Recolor to green or any other hue.

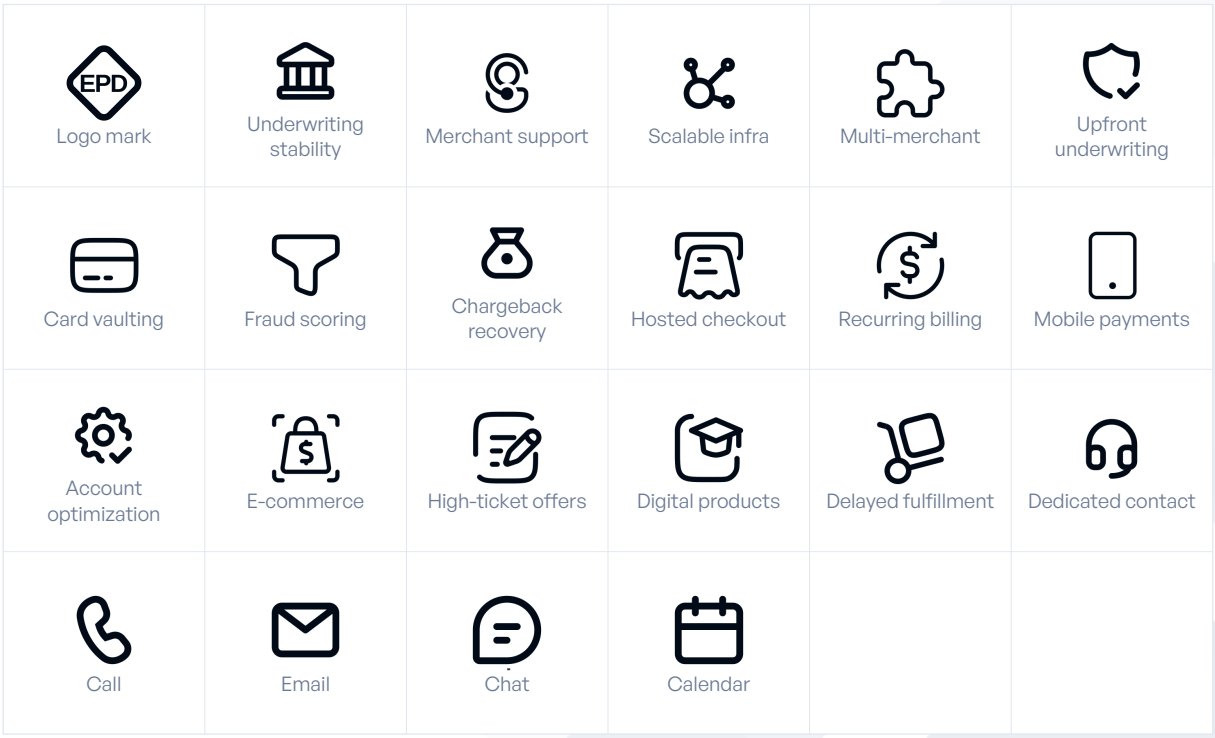

DON'T Place it at the center.

ICONOGRAPHY

The icon system.

Line icons rendered at a consistent stroke weight, drawn from the product library. The diamond mark leads the family, rebuilt as an icon-style outline so the mark reads as one of us when it sits next to any other icon. Use for feature grids, industry pages, contact channels, and support states. Icons render in dark navy on light backgrounds and in white or Blue 300 on dark backgrounds.

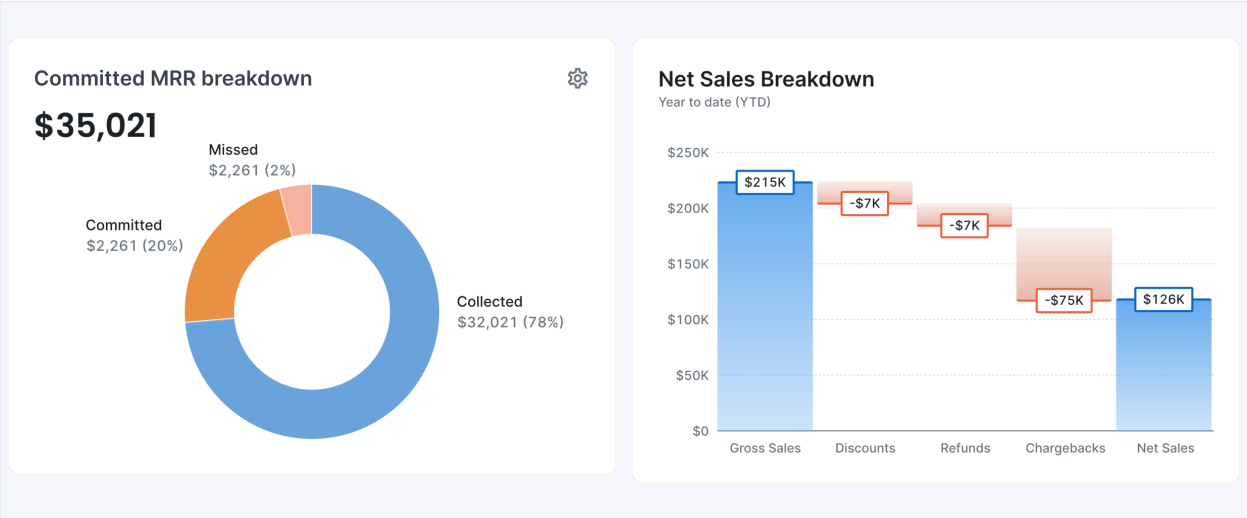

Grid: 24 × 24px master frame. Stroke weight: 1.5px at 24px reference size. Corners are rounded to 2px. Icons render at native color or in Neutral 900 on light backgrounds.

PRODUCT IN USE

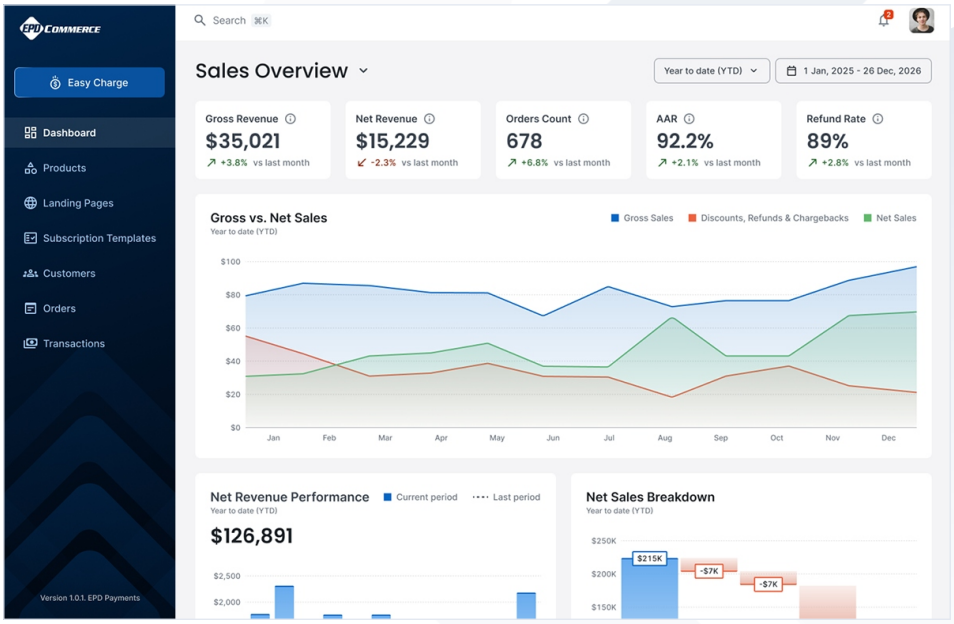

How the brand shows up in product.

Same palette, same typography, same voice. Data visualizations use the blue ramp for positive and neutral series. Warm accents only when subtracting or flagging concerns.

NET SALES BREAKDOWN · WATERFALL CHART

EPD COMMERCE DASHBOARD · LIVE PRODUCT

SECTION 07

Making graphics.

Generate the background, then paste the real logo, motif, and product graphics on top.

MAKING GRAPHICS

Generate, then composite.

Image models paraphrase what they see. They cannot reproduce the logo, the motif, payment marks, or product UI exactly. Every Easy Pay Direct graphic is built in two steps.

1. Generate the background	Prompt the image model for the scene, lighting, and brand colors only. Tell it to leave specific regions empty: the top strip for the logo, the side edges for the motif, a content well for a graphic.
2. Composite the real assets	Paste the logo, motif, and any approved graphic from the brand repository, pixel for pixel, with scripts/composite.py or any layered editor.

EXAMPLE

```
python scripts/composite.py --base bg.png --motif side-right --logo top-left \
  --graphic dashboard-card-donut-composite --graphic-pos center-right --out ad.png
```

NEVER GENERATE

Logo	Always pasted from assets/logo.
Motif	Always pasted from the five files in assets/motif.
Payment marks	Card brands and partner logos come from their official files.
Product UI	Use assets/approved-graphics. If nothing fits, ask for a real screenshot.

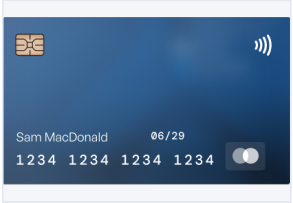

MAKING GRAPHICS

Approved graphics.

These are the only product and card graphics cleared for marketing. Reference them by key in composite.py with --graphic. Files live in assets/approved-graphics.

SECTION 08

Beyond A Million Awards.

The proprietary merchant recognition program. Four tiers, four badges, one diamond motif.

BAM AWARD BADGES

Beyond A Million Awards.

A proprietary Easy Pay Direct program that rewards verified processing milestones. Each badge is a diamond-shaped graphic echoing the logo mark. Display on merchant-facing pages, case studies, testimonials, and share images.

BAM
$1M+

BAM X
$10M+

BAM 50
$50M+

BAM 100
$100M+

Tier definitions

TIER	BADGE	THRESHOLD	DESCRIPTION
01	**BAM**	**$1M+**	Recognizes merchants who have surpassed $1M+ in verified lifetime processing volume through Easy Pay Direct.
02	**BAM X**	**$10M+**	Represents merchants who have achieved $10M+ in verified transaction volume and continued business growth.
03	**BAM 50**	**$50M+**	Awarded to merchants who have exceeded $50M+ in lifetime processing milestones through the platform.
04	**BAM 100**	**$100M+**	The highest recognition tier, awarded to merchants surpassing $100M+ in verified processing volume.

Note: Badges are issued only after verified processing volume is confirmed. Display at the exact ratios shown; do not recolor, restyle, or crop.

SECTION 09

Voice & copy.

How we sound in writing. Confident, direct, and always benefit-led.

VOICE & COPY

How we sound.

Confident, direct, benefit-led. Short headlines in sentence case. Numbers do the heavy lifting. We source them from the locked stats. We never fabricate.

POSITIONING

The fastest safe way to accept payments.

Life for an entrepreneur is tough. Applications, underwriters, gateways, shopping carts, integrations. All while trying to focus on the big picture. Easy Pay Direct does it for you: one application, one point of contact, true diversity and security in merchant accounts.

We're here to make things easier.

Do	Don't
Use sentence case in headlines: "Payments built for growing businesses."	Use Title Case Headlines That Feel Corporate.
Introduce sections with UPPERCASE DM Mono eyebrows: WHY EASY PAY DIRECT.	Use decorative headings, cursive fonts, or all-caps body copy.
Let stats do the work: 100k merchants helped, 13+ years, 500+ integrations, billions processed.	Invent or estimate figures. Every number must be sourceable.
Keep it short. Short headlines, short paragraphs, short CTAs.	Write marketing paragraphs that read like whitepapers.
Say what we do plainly: "Get approved. Start processing. Get paid."	Use vague fintech buzzwords: synergy, ecosystem, seamless.
Use commas, periods, or parentheses for punctuation breaks.	Use em dashes. They are off brand.
Write Easy Pay Direct in full.	Shorten it to EPD.

Sample hero copy in place

WHY EASY PAY DIRECT

Payments built for growing businesses.

Accept credit cards with a payment platform designed to support your business as it starts, grows, and scales, without interruptions or unnecessary risk.

AGENT CHECKLIST

The 60-second brand check.

For LLMs, contractors, freelancers, or anyone creating Easy Pay Direct output. If you can check every box, you're on brand.

☐	COLOR	Dark sections on brand blue #003C7E, #000914 for the deepest surfaces
☐	COLOR	Green #3DDC73 for CTAs only
☐	COLOR	Gold #FFC046 reserved for star ratings, nowhere else
☐	TYPE	General Sans for headings (Medium 500) and body copy
☐	TYPE	DM Mono UPPERCASE for eyebrows, buttons, stats, and labels
☐	TYPE	Sentence case in headlines, never Title Case
☐	CTAS	"Get Started" (primary green) and "Talk to a Specialist" (secondary outlined)
☐	CTAS	4px button radius, black text on the green primary
☐	LAYOUT	Cards use 10px radius with 1px border-glow, not drop shadow
☐	LAYOUT	1440px page shell with 1420px content cap
☐	COPY	Stats sourced from the locked list, never invented
☐	COPY	No em dashes anywhere in the copy
☐	COPY	No bold headlines, no gradients outside blue
☐	COPY	Write Easy Pay Direct in full, never EPD
☐	ASSETS	Logo, motif, and graphics pasted from source files, never generated
